

Termite Hill Gecko

OVERVIEW

- Scientific Name: *Hemidactylus triedrus*
- Origin: South Asia
- Ease of Care: Beginner
- Potential Adult Size: 6-7 inches
- Life Span: Up to 15 years
- Behaviour: Nocturnal
- Diet: Insectivore
- Handling: Beginner
- Humidity: 50-70%

TOP TIPS

- ✓ Provide climbing opportunities throughout the enclosure
- ✓ Add live plants to help maintain humidity

HOUSING

The HabiStat Glass Terrarium 45cm x 45cm x 45cm (HGT4545) is ideal for this species throughout their life.

If you already have the appropriately sized terrarium, the HabiStat Crested Gecko Accessory Kit (HSCGAK) will provide everything else you need in one handy kit for this species.

EQUIPMENT NEEDED

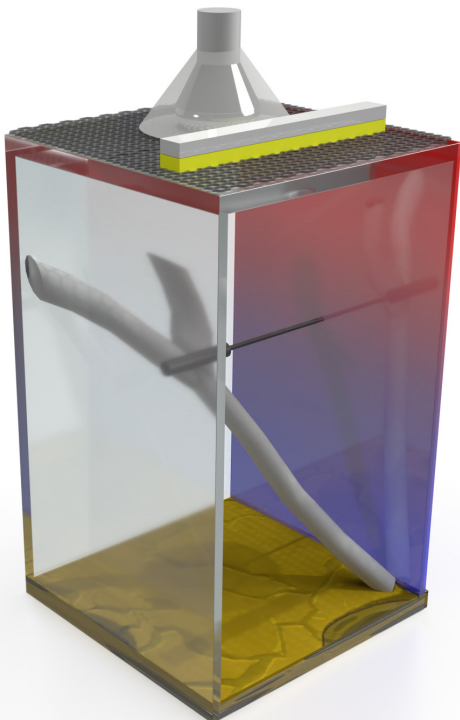

- Housing: Terrarium
- Heating: Heat-Bulb
- Lighting: UV Tube (Light Cycle: 12 Hours of light)
- Substrate: HabiStat Jungle Bio (HSJB10), HabiStat Coir (HSCB)
- Water: HabiStat Sandstone Water Dish (HRSSCM)

ENVIRONMENT

Terrarium Setup

Heating

Termite Hill Geckos are an ectothermic (cold-blooded) animal and take all their heat requirements from external sources.

- Background Temp: 24-27°C (75-80°F)
- HOT Spot: 29-32°C (85-90°F)
- Night-Time Temp: 20-24°C (70-75°F)

Use a HabiStat 100w Basking Spotlamp (HBB100) in an Arcadia Reflector Clamp Lamp holder (RARTG75) running through a HabiStat Dimming Thermostat (HTDW) to provide overhead heat. This can be placed on the mesh roof of the Terrarium.

Dimming thermostats are designed to regulate temperatures using a thermostat probe (also known as a sensor). Correct placement of the

probe is critical to avoid overheating and injury to the animal.

Check temperatures regularly, using a reliable thermometer and hygrometer to ensure that there are no extreme fluctuations.

Lighting

Use the Arcadia ShadeDweller Arboreal 7% (RARTP8S), as this is specifically designed for forest dwelling reptiles.

Make sure the UV light is fitted correctly and that the Gecko is not able to get too close.

Substrates and Decoration

Personal choice will dictate how you decorate your enclosure, but we recommend the following as a guide:

- HabiStat Jungle Bio (HSJB10), or HabiStat Coir (HSCB)
- HabiStat Cork Branch (HDB1), HabiStat Grapevine (HSGV) and HabiStat Tea Tree Branch (HSNTB) will offer shelter and enrichment within the enclosure.
- HabiStat Forest Hideout (HSNFHM) will offer shade and shelter for the Gecko.
- Live or artificial plant decoration will provide darker areas for the animal to use as shelter

DIET & WATER

Ensure a Termite Hill Gecko is offered a variety of insects.

Make sure to feed when they are most active, usually in the evening.

Always provide a source of fresh water using the HabiStat Sandstone Water Dish (HRSSCM).

To maintain and regulate humidity within the enclosure, mist as required.

SUPPLEMENTATION

Termite Hill Geckos need additional supplementation in the form of a calcium and multi-vitamin powder such as Arcadia Earth Pro-A (RAREP100) and Arcadia Earth Pro Calcium Mg (RAREPCM80). Follow the on-pack instructions.

ADDITIONAL INFORMATION

- As a semi-arboreal species, ensure you provide low level branches for climbing and plenty of substrate within their enclosure

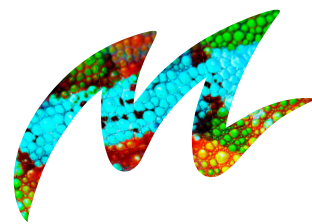

HEALTH & HYGIENE

We recommend the following cleaning routine to keep your Termite Hill Gecko healthy and happy:

	Water	Substrate	Enclosure
Daily	Change old water for fresh water	Spot clean	Check vents on enclosure are not blocked and allow air to pass through freely
Weekly	Disinfect water bowl or dish	Agitate substrate to prevent any bacterial build up and to allow any dirty bedding to be removed	Wipe down glass and walls with a reptile safe disinfectant
Monthly		Take out old substrate and replace with new substrate	Wipe down inside the enclosure and disinfect décor with a reptile safe disinfectant

Always wash your hands, surfaces and equipment with warm water and disinfectant immediately before and after handling your animal, their food, enclosure, and any other equipment.
