

European Eyed Lizard

OVERVIEW

- Scientific Name: *Timon lepidus*
- Origin: Southern Europe
- Ease of Care: Intermediate
- Potential Adult Size: 20 to 24 inches
- Life Span: 15 years
- Behaviour: Diurnal
- Diet: Insectivore
- Handling: Intermediate

TOP TIPS

- ✓ A Vivarium is best suited for European Eyed Lizards
- ✓ Vary your European Eyed Lizards food to keep it stimulated
- ✓ Use a sand scoop when spot cleaning

HOUSING

HabiStat Standard Vivarium 48x24x24" (DVF4824),
HabiStat Standard Vivarium 60x24x24" (DVF6024)

EQUIPMENT NEEDED

- Housing: Vivarium
- Heating: Heat Bulb
- Lighting: UV Tube (Light Cycle: 12 hours of light)
- Substrate: HabiStat Jungle Bio, Arcadia EarthMix Arid
- Water: Water bowl

RUNNING COSTS

- Average Cost: 43p Per Day
- Average kW per day: 0.869

Calculations are based on using the recommended timings, heating, and lighting provided throughout the care sheet, and the Electricity unit rate of 28p per kWh.

£

ENVIRONMENT

Vivarium Setup

Enclosure Readings

- Hot Spot: 35°C-40°C (95°F-104°F)
- Background Temp: 23°C-30°C (73°F-86°F)
- Night-Time Temp: 16°C-23°C (61°F-74°F)
- Humidity: 30%-50%
- UVI: 3-4

Heating

European Eyed Lizards are a diurnal species and require a suitable light and heat gradient in the enclosure to simulate a complete 24-hour period.

The HabiStat Bearded Dragon Accessory Kit (HSBDK) provides all the light, heat, and safety elements for the enclosure in one handy kit.

Use the Arcadia Pro Ceramic Lamp Holder & Bracket (RADCHP) with the HabiStat Heat Bulb (HBB100) and the HabiStat Heater Guard (HHG24) protecting the bulb, all running through the HabiStat Dimming Thermostat (HTDWHR).

Dimming thermostats are designed to regulate temperatures using a thermostat probe (also known as a sensor). Correct placement of the probe is critical to avoid overheating and injury to the animal.

Check temperatures regularly, using a reliable dual thermometer and hygrometer to ensure that there are no extreme fluctuations.

Lighting

Fit the Arcadia Pro T5 UVB Kit, 12% (RARTP39R) to the inside roof of the vivarium, with the Arcadia Lamp Guard Pro (RALGP4) protecting the UV tube.

Ensure that it is fitted correctly and within the manufactures recommended distances, providing a UVI of 3-4.

Substrates and Decoration

Personal choice will dictate how you decorate your enclosure, but we recommend the following as a guide:

- HabiStat Jungle Bio (HSJB10), Arcadia EarthMix Arid (RAREA10)
- HabiStat Cork Branch (HDB1), HabiStat Grapevine (HSGV) and HabiStat Tea Tree Branch (HSNTB) will offer shelter and enrichment within the enclosure.
- Live or artificial plant decoration will provide darker areas for the animal to use as shelter
- A moist hide such as the HabiStat Log Hideout (HSNLHEL) filled with damp HabiStat Sphagnum Moss (HSMS250) will be beneficial to the species.

DIET & WATER

Ensure a European Eyed Lizards has a varied diet, with a mixture of insects.

Young/Juvenile – Several appropriately sized feeders 2 to 3 times per week such as:

- House Brown Crickets – 3rd (LSC200)
- Locust – Small Hopper (LSH20)
- Calci Worms – (LCW40)

Adult – Several appropriately sized feeders 1 to 2 times per week such as:

- Earthworm (LEARTH)
- Locust – 5th Hopper (LLH15)
- Dubia Roaches – Adult (LDLA6)

Always provide a source of fresh water. The HabiStat Sandstone Water Dish (HRSSCM) will provide a safe and sturdy option.

To maintain and regulate humidity within the enclosure, mist as required.

SUPPLEMENTATION

European Eyed Lizards need additional supplementation in the form of a calcium and multi-vitamin powder such as Arcadia Earth Pro-A (RAREP100) and Arcadia Earth Pro Calcium Mg (RAREPCM80).

Please follow the packaging instructions.

ADDITIONAL INFORMATION

- This species will benefit from a deep substrate to burrow in.
- A moist hide will be beneficial for the species.

HEALTH & HYGIENE

We recommend the following cleaning routine to keep your animal healthy and happy:

	Water	Substrate	Enclosure
Daily	Change old water for fresh water	Spot clean	Check vents on enclosure are not blocked and allow air to pass through freely
Weekly	Disinfect water bowl or dish	Agitate substrate to prevent any bacterial build-up and remove any dirty bedding	Wipe down glass and walls with a reptile safe disinfectant
Monthly		Take out old substrate and replace with new substrate	Wipe down inside the enclosure and disinfect décor with a reptile safe disinfectant

Always wash your hands, surfaces and equipment with warm water and disinfectant immediately before and after handling or feeding your animal, their food, enclosure and any other equipment.

HANDLING & CARE

While this species is generally placid and will tolerate gentle handling, this can at times be very stressful for the animal, so any handling should only be done in short periods.

Things to look out for that will need veterinary assistance:

- Skin shedding problems (retained shed)
- Going off food
- Loose bowel movements

Should your animal display any signs of distress, changes in regular behaviour, or anything visually different, please seek help from your Reptile Veterinarian.
